

3 Gigabit Fiber Optic Cable Configuration Standards

Overview

3-E “Optical Fiber Cabling and Components Standard” was developed by the TIA TR-42. Scope: This Standard specifies performance, transmission, and test and measurement requirements for premises optical fiber cable. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Fiber optic networks rely on a foundation of rigorous international standards that define. In computer networking, Gigabit Ethernet (GbE or 1 GigE) is the transmission of Ethernet frames at a rate of a gigabit per second. It came into use in 1999 and has replaced Fast Ethernet in wired local networks due to. 'A document established by consensus and approved by a recognized body that provides for common and repeated use, rules, guidelines or characteristics for activities or their results, aimed at the achievement of the optimum degree of order in a given context'. Standards have existed as long as. IEC Technical Committee (TC) 86—which prepares standards for fiber-optic systems, modules, devices and components—includes three main subcommittees: SC 86A (Fibers and Cables), SC 86B (Interconnecting Devices and Passive Components) and SC 86C (Systems and Active Devices).

FOA Standard For Installing Fiber Optic Cable Plants

Fiber optic cables may contain multimode optical fibers, singlemode fibers or a combination of the two, in which case it is generally referred to as a “hybrid” cable.
