

A router is still needed when upgrading broadband to fiber optic

Overview

While fiber internet doesn't require a modem, you still need a router to distribute the connection across your network. Hello I am considering upgrading to Full Fibre 150 from superfast and was enquiring what is involved?

Do I require a new router, which comes with all the complications or is it just a cable connection to existing router?

What's this?

28 Jan 2025 01:11 PM Posted by a Superuser, not a Sky employee. It depends how you use your broadband, how happy you are with your current speeds, and whether you're ready for a small bit of disruption to get the faster line installed. Do I Need a Special Router for Fiber Optic Internet?

Fiber internet transmits data using light signals through fiber-optic cables, which differs from traditional. The answer is actually no—fiber optic equipment differs significantly from cable setups. Full Fibre connections involve fibre-optic cables running directly into your home, delivering higher speeds and more consistent connectivity than traditional broadband. To fully benefit from these improvements.
