

## AI Takes Over Server

### Overview

To meet the skyrocketing progression and demand of AI systems, AI servers have taken over the global server market as one-third of the total servers' shareholders. "Stormgate's" multiplayer servers went offline at the end of April because an AI company took over the responsible supplier. The shutdown shows how AI infrastructure expansion is now. Is AI secretly jeopardizing your favorite online games?

The popular RTS game Stormgate is facing a grim future as its multiplayer servers vanish by the end of April 2026. more Is AI. The combination of Big Data and ML (machine learning) technologies makes it possible to automate processes and increase the efficiency and reliability of IT systems. In the article we will find out how artificial intelligence is changing the management of servers and data centers, what new. North American CSPs' continued investments in AI infrastructure are expected to increase global AI server shipments by more than 28% YoY in 2026, according to the latest market research from TrendForce.
