

Cable routing rack for fast and even cable pressing

Overview

When rack space is at a premium, you'll want gear that helps you to route cables quickly, without losing RU. Telescoping and horizontal lacer bars are options that work like a charm. one was designed with the user in mind – for IT engineers by an IT engineer – to keep network racks organized. It is an all-in-one cable management solution consisting of 24 retractable Cat. Our innovative system. Efficient cable routing panels play a critical role in maintaining organization and promoting airflow. From finger ducts to removable covers, the right features can make a significant difference in how you manage your cables. Full solutions include Power Distribution & PDUs, Heat Containment Systems and Cable Management and Pathways options designed to maximize cable density and protection, while simplifying. This cold-rolled steel SmartRack® Cable Trough helps eliminate cable stress by routing cables from the front of your wide rack cabinet to the rear, where you can more easily organize and access them. The SRCABLETROUGH's telescopic design and the included screws allow you to adjust the cable manager. Cable management systems come in several types: raceways contain cables in rigid channels, horizontal managers segment connections at specific rack heights, vertical panels organize cables along the rack's length, and D-rings secure cables with minimal obstruction.
