

Cable tray spring clip installation

Overview

Recommend to use 8 spring clips for all standard 3mt trays, and 6 clips on all tray fitting covers. To avoid damaging the base material or fixing attachment. Follow the recommended torque of 12 Nm. The correct installation of cable ladders and cable trays is important to help maximize the safe working load as defined by our published load tables and to minimize deflection. Typically, installation guidelines will also depend on the project specification required by the client, but this will. Look how easy it is to install our Cable Tray Clip! No tensioning tool required! #Cabling #Cable #ElectricianLife #CableTrayClip #LINIAN #Electrician #Sparky #ElectricalC. During forklift offloading on uneven ground, one must exercise extreme caution to prevent load shifting. Only, en completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. Use three clips per strut support for trays up to 18" (457mm) and add one clip per strut support for each additional 6" 150mm) of tray width.
