

Cable trays for high-voltage lighting wires and low-voltage wires

Overview

Explore various cable tray types and sizes for electrical installations. Learn about ladder, perforated, solid-bottom, wire mesh, and channel trays in this complete guide. Wire. Our Wire Mesh Tray creates a dedicated pathway for all low-voltage and data cables. It is constructed of precision-engineered, high-quality welded steel wire and is the result of decades of research gained from the installation of over 160,000 miles of tray across the globe. Our tray features our. ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing), directly from production facilities in Canada and Saudi Arabia. In telecommunications, properly spaced cables help to reduce cross-talk and interference.
