

Can fiber optic cables relay two routers

Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Assume you have house with direct access to an optic fibre cable (FTTP). In the basement, there is the ONT+residential gateway device that converts the light impulses to Ethernet. This setup has to be changed because the house will be. The goal is NOT to extend the network, but make two independent networks for two families. On each floor each. As far as I can tell, your cable matches your transceivers; SC (connector style) and single mode (fiber style). If you will need any assistance with your project. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX.
