

Coherent Optical Module Specifications

Overview

The CORX – Coherent Optical IQ Receiver is a fully integrated, high-performance reception module for coherent optical signals in the C-band. Cisco has expanded the range of 400G digital coherent QSFP-DD transceivers with the 400G QSFP-DD. It is designed to avoid having to tear out existing equipment. They are capable of distances ranging from very short reach within a data center to campus, access, metro, and long-haul reaches. They also feature outstanding performance over extended voltage and temperature ranges, while minimizing jitter. Nokia's 100G ZR coherent module (QDCO1) provides the capacity and optical reach of coherent optics in flexible, small-sized QSFP28 modules. The QSFP-DD coherent optical module uses a 76-pin connector as an. Coherent optical module refers to a typically hot-pluggable coherent optical transceiver that uses coherent modulation (BPSK / QPSK / QAM) rather than amplitude modulation (RZ/ NRZ / PAM4) and is typically used in high-bandwidth data communications applications.
