

Construction Cost of Small IDC Data Center

Overview

Data center construction costs average \$10-\$12 million per MW, and AI-optimized facilities can reach as high as \$20+ million per MW. The data centre market is entering a new era, driven by the explosive growth of artificial intelligence (AI) and surging global demand. This helps businesses stay competitive, agile and. Operational costs for modern data centers can range from \$10 million to \$25 million annually, heavily influenced by power consumption, maintenance, and staffing expenses. Tight coordination, realistic benchmarks, and the right logistics tools keep projects predictable. Therefore, if a 700,000-square foot, 60-megawatt data center were to be built in Northern Virginia, the world's largest data center. Whether it's your first site or a big expansion, you need to know exactly where your money is going before you spend a single cent. This explosion shows how much the world is.
