Unified Facilities Criteria (UFC) | WBDG

Get Ready for the NEW Whole Building Design Guide: The Innovative Platform Advancing Building Standards [Read More](#) → Unified Facilities Criteria (UFC)

UFC 3-580-01 Information and Communications Technology

This UFC provides design criteria for telecommunications spaces, pathways, cabling, and interconnecting components necessary to support the infrastructure for voice, data, video, smart

UFC 4-020-01 DoD Security Engineering Facilities Planning Manual

Those requirements come from the DoD Minimum Antiterrorism Standards for Buildings, combatant command standards, standards from other DoD components or commands, regulations, or installation...

Design of Emergency Shelters and Safe Rooms for Military and Civil Defense

Discover essential insights into the design of emergency shelters and safe rooms, emphasizing security, resilience, and adaptability for military applications.

UFC 4-021-02 Electronic Security Systems

The purpose of this UFC is to provide requirements and guidance for designing Electronic Security Systems (ESS) in support of Department of Defense (DoD) physical security program requirements.

UFC 1-200-01: DoD Building Code Update | PDF

It provides guidelines for planning, design, construction, and modernization of military facilities, with periodic updates to ensure compliance with evolving standards.

Communication Facilities Construction Design Standards

The distribution systems are designated to house the cables and wiring necessary to connect communications equipment with the control and cross-connecting switching equipment located in the

Technical Specifications for Construction and Management of

Chapter 1. Introduction Purpose This Intelligence Community (IC) Technical Specification sets forth the physical and technical security specifications and best practices for meeting standards of Intelligence

UFC 1-200-01 DoD Building Code

UFC and FC requirements are intended to address code-compliant facility requirements; life, health and safety requirements; property loss prevention; lowest lifecycle cost; and facility operational

ICT NETWORK STANDARDS

The Building Communications Room shall be responsible for supporting Campus switching and Routing equipment and distributes network connectivity throughout building via floor level general

UFC 1-200-01 DoD Building Code (General Building Requirements)

UFC 4-010-01 sets the minimum requirements for DoD buildings, and the Geographic Combatant Commander Antiterrorism Construction Standards address unique requirements specific to their area

UFC 4-215-01 Armories and Arms Rooms

A listing of documents is in Appendix A - References Description: The UFC 4-215-01, Armories and Arms Rooms, represents another step in the effort to bring uniformity to the planning,

SPECIFICATION 271100 COMMUNICATIONS CABINETS AND

This section includes the specifications for constructing and building out of Telecommunications Equipment Rooms (MDF/IDFs) to be used for supporting telecommunications

SCIF/SAPF Planning, Design, and Construction

IC Tech Spec-for ICD/ICS 705 provides the minimum and enhanced construction requirements for the perimeter with regard to forced entry, covert entry, visual evidence of surreptitious...

UFC 1-200-01 DoD Billing Code

FOREWORD The Unified Facilities Criteria (UFC) system is prescribed by MIL-STD 3007 and provides planning, design, construction, sustainment, restoration, and modernization criteria, and applies to

Communication Rooms

Electrical rooms on upper floors should be located to allow efficient distribution. Size and locate rooms to allow equipment removal and maintenance. Electrical rooms

Safe Rooms and Shelters

This guidance complements other shelter publications such as the American Red Cross (ARC) 4496, Standards for Hurricane Evacuation Shelter Selection; FEMA 320, Taking Shelter From the Storm:

D60 -Communications Equipment Room

The Communications Equipment room Facilities Standard establishes a series of guidelines for specifying this particular item on any construction project at the University. This Facilities Standard is

GENERAL DESIGN REQUIREMENTS

GENERAL GUIDANCE REGARDING DESIGN Commissary facilities are Department of Defense (DoD) projects, and as such must be constructed in accordance with the following criteria, codes, and

Technical Specifications for Construction and Management of

Review and approve the design concept, Construction Security Plan (CSP), and final design for each construction project prior to the start of SCIF construction.

Telecommunications Infrastructure Specifications

Room Use – The Construction Professionals will design and construct the Telecommunications Rooms to house only telecommunications and information technology functions

AFRCH 32-1001 Standard Facility Requirements

Entry control to the Command Post, associated equipment/communications rooms, and emergency generators are outlined in AFI 31-101, Integrated Defense, as supplemented.

Design for Department of Defense (DoD) General Building Requirements

This UFC applies to the design and construction of all new and renovated facilities for the Department of Defense. It is applicable to all methods of project delivery, including both design-bid-build and design

Telecommunications Guidelines

The DFD has adopted the recommendations TIA-569-C “Commercial Building Standard for Telecommunications Pathways and Spaces” in its guidelines relating to equipment room hierarchy,
