

Cost of a telecommunications tower

Overview

Telecom tower pricing typically ranges from \$15,000 to over \$150,000 for the structure itself, heavily dependent on height, design type, and current global steel prices. A standard 40-meter lattice tower might cost significantly less than a camouflaged monopole of the same height due to design. On average, the total cost to build a cell tower in the United States is \$250,000, while in Western Europe it is \$135,000, and in Latin America it is \$110,000. Cell tower build costs can vary significantly depending on the site location and terrain, as well as the type and height of the tower. Dgtl. A telecom tower is a freestanding mast, pole, free-standing tower, or other structure designed and primarily used for a public utility to support wireless telecommunications facility antennas. 38 billion in 2025 and estimated to grow from USD 14. 12% during the forecast period (2026-2031). This growth unfolds as carriers offload passive assets to independent. Get accurate estimates for telecommunication tower installation costs with our expert calculator. See the data that the pros use.
