

Delivery time for high-speed optoelectronic connection SFP

Overview

Our standard lead time is 2-4 weeks for regular products. We also maintain inventory for popular models to provide shorter delivery times. Do your products comply with. As data centers expand, 5G and edge networks mature, and AI workloads multiply, the small form-factor pluggable (SFP) optical transceiver — once seen as a modest workhorse — is stepping back into the spotlight. Whether deploying enterprise switches, telecom backbones, or data center links, engineers often assume that speed (1G, 2. 5G, or. SFP (Small Form-factor Pluggable) is a compact, hot-pluggable network interface module used to connect network devices (switches, routers, firewalls) to fiber optic or copper cables. Think of it as the “translator” for your network equipment, converting electrical signals into optical signals. Demand for the latest high speed network solutions has grown rapidly, driven by the massive shift to cloud services by businesses and individuals. These small yet flexible devices help keep networks running smoothly, especially as.
