Eight-meter span bridge

Overview

Each bridge consists of two 4-metre-long, 900mm-wide sections, securely bolted together with plates to create an 8-metre span. Designed for lightweight handling and rapid deployment, the bridge can be installed without heavy lifting equipment. The 1915 Çanakkale Bridge in Turkey, opened in 2022, has the longest central span (2,023 m) of any suspension bridge. It crosses the Dardanelles in Turkey., the length of suspended roadway. What size steel beam do you need for 3m, 4m, 5m, 6m, 7m, 8m & 10m span depends on various factors, including the load it needs to support and the type of steel beam being used. 2 meters and 300 people can cross the bridge at a time, in winds of up. The Platform-to-Platform Bridge is a lightweight aluminium walkway system designed for safe and efficient crossing between platforms for station works and temporary access requirements. For a two-beam bridge, you can utilize W8x31 (50 ksi) steel beams for your 8-meter span bridge.
