

Ethiopia Fiber Optic Channel Intelligent ODM

Overview

Our services include route planning, fiber installation (underground and aerial), splicing, termination, and network testing to ensure seamless performance. With our expertise, we continue to expand Ethiopia's telecom network, delivering scalable and robust connectivity. State-owned telecom operators from Djibouti, Ethiopia and Sudan have signed a tripartite agreement to build a new cross-border fibre-optic corridor, a project aimed at strengthening regional connectivity, expanding data capacity and reducing the risk of internet outages in the Horn of Africa. In a landmark development for Africa's digital. Liquid Intelligent Technologies (Liquid), a business of Cassava Technologies, a pan-African technology group, announces the launch of two new fully redundant terrestrial routes – Kenya to Ethiopia and Zambia to Malawi. This significant achievement will allow for greater efficiency and reliable. We have deployed over 250 kilometers of fiber infrastructure across Ethiopia, providing high-speed, reliable connectivity.
