

High Voltage Application Busbar

Overview

From high-voltage DC transmission to switchgear and converters to general industrial applications, busbar systems can be used in numerous fields of application for power transmission, especially in the low-voltage but also in the medium or high-voltage range. One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client specifications. Busbars are essential components in electric vehicles (EVs), which are increasingly cornering the automotive market worldwide. In the automotive sector, the overmolded busbar is used to safely conduct the electrical current between high-voltage storage unit, control unit, drive and charging unit. Our primary manufacturing processes include progressive stamping, Computer Numerical Control (CNC) bending and our RigiFlex™ technology that delivers flexible solutions. Busbars provide a safe HV connection on shorter distances.
