

How to reconnect a disconnected fiber optic connector

Overview

This article outlines five specific steps for repair: 1) Identify the break; 2) Cut out the damaged section; 3) Strip the cable; 4) Trim the fiber ends; 5) Test the repair. DIY fiber optic cable repair kits are increasingly popular for those who prefer home repairs. This wikiHow article will teach you how to splice a cut fiber optic cable back together with a fiber optic stripper and cutter and a fiber optic crimper. Once these tools are ready, you can start the repair step by step. The actual steps may vary depending on the cable and/or connectors. Fiber optic cables are typically damaged in one of two ways: A premade fiber optic cable suffers connector damage when too. A cut or damaged fiber optic cable can disrupt your network, but it is repairable with the right tools and techniques.
