

Huawei optical switches

Overview

Huawei's StarryLink optical modules for data center networks offer seamless interconnection from GE to 800GE across all scenarios, delivering customers an ultra-reliable, long-distance, and highly secure data center network interconnection experience. CloudEngine S5736-S Series Switches are next generation standard all-optical GE switches, with 48 downlink optical ports and four 10 GE uplink ports. Non-certified optical or copper modules cannot ensure transmission reliability and may affect service stability. Within the fast-paced world of industrial networking, the S5735-L48P4X-A Huawei switch provides a "simplified" yet powerful architecture. By focusing on specific industries and key scenarios, Huawei has upgraded its F5G-A all-optical network solutions to accelerate AI adoption across all sectors, helping to build an intelligent world. Based on PON technology, passive all-optical network access solutions enable access by any media. All other trademarks and trade names mentioned in this document are the property of their respective holders. The purchased products, services and features are stipulated by the contract made between Huawei and the customer.
