

Installation on top of the mesh cable tray cabinet

Overview

An FASP support can be bolted directly to the cabinet. If the wire mesh cable tray is to be raised a specific height above the cabinet, then we recommend a UFS support bracket or an FASP elevated with threaded rods. Depending on the type and version of mesh cable tray, as well as the corrosion protection used, the mesh cable tray systems can be ambient temperatures of - 20 °C to + 120 °C. Was this article helpful?

Cable Trays & Reels - Describes how to attach Cablofil. Speed up your installation process and add aesthetic touches to even the most difficult angles with bolted and boltless joint fittings options, new snap-on wire mesh cable trays and flexible bending application. The short answer is that you need to measure up, choose the right tray type, install strong fixings, and follow cable capacity guidelines. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is intended for instrumentation and control applications that require.
