

Internet speed slowed down after replacing the fiber optic router

Overview

Quick answer: restart your router, update its firmware, check for signal interference, and optimize your WiFi settings to boost your internet speed. These simple steps can significantly improve your connection and eliminate frustrating lag. If you're dealing with slow internet speeds after replacing an old router with a new one and wondering "Why is a new router even slowing down my internet?"

", we're here to share something that we worked out recently and hope it will help you also. There are many reasons why you may have a slow. So I have recently changed my router (its spec is definitely better than my old one), however, my downloading speed drastically decreases from 12mbps+ to 400kbps and I don't why. Does the download speed start at 12 mbps and then drop or does the speed vary up and down?

On your pc run "ipconfig. Making the switch to fiber is a major upgrade, and it's often marketed as the ultimate internet experience. Well, that wasn't my experience. The best way to find the source of your slowdown woes is to run a few speed tests.
