

Low-noise Brazilian integrated container rack for surveillance

Overview

These GSA Approved Class 5 containers offer 24/7 secure, on-line access, with flexible rack mounting and low-noise cooling. Perfect for various applications from SIPRNet nodes to tactical deployments, they provide cost-effective, transportable, and scalable security solutions. The SecurOS® UVSS is a hardware-software based system for under-vehicle surveillance. The system creates a database of high-resolution undercarriage images and recognized vehicle license plates. Unusual Activity Detection alerts you of atypical activities, such as people and vehicles in odd locations or traveling at. IPS (Information Processing System) Security Containers are a cost effective alternative to a CAA or facility/SCIF build out, allowing on-line, closed-door, unattended, 24/7 operation of stand-alone or networked classified applications. The Maritime Surveillance is intrinsically linked to several factors, particularly the maritime compliance requirements demanded by specialized agencies, as well as fleet monitoring and management. CLS Brasil is authorized by the main Brazilian regulatory agencies and is fully qualified to assist. In this white paper, we explore this need in greater depth and look at how surveillance technology can be utilized to protect the people, products, and processes based in, or passing through, ports across the globe. Ports require a three-pronged approach to protection.
