

Low-voltage intelligent distribution cabinet protection

Overview

They distribute power efficiently, control current flow, and protect circuits from overloads, short circuits, and other faults. Found in hospitals, data centers, factories, commercial buildings, and renewable energy installations, LV cabinets are critical for uninterrupted. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4. 0 are phenomenon which are changing the world we are living in. The intelligent power distribution monitoring terminal, this low voltage distribution cabinet. SP-JP intelligent low-voltage integrated distribution box is a new generation of intelligent low-voltage integrated distribution box developed and produced by our Company in accordance with the latest standards of State Grid Corporation of China. This essential electrical equipment manages and controls the distribution of electricity from the main power source to various circuits. At present, low-voltage distribution cabinets on the market are mainly divided into two categories: fixed type (such as GGD, GHK series) and drawer type (such as GCK, GCS, MNS series).
