

Making cable trays without rivets

Overview

For sustainable DIY cable management, consider using recycled cardboard to create custom organizers, bamboo for stylish trays and clips, or jute and hemp twine to reduce plastic waste. Upcycled fabric pouches from old clothes add both function and flair, while natural wood clips. However, I find that cable ties bind when you want to remove, replace or add a cable—and, apart from expensive trunking, the other cable-tidy gadgets I've seen look just as cumbersome or fiddly to use. Therefore, as part of our recent major home office makeover, I decided to make my own cable. Anyone recommend a cable tray that fits to the desk with clamps/vices instead of screws?

Archived post. Before caving and buying a screw-mounted solution, I quested high and low for the answer to this question. This quick, friendly guide covers tools, materials, and cleanup tips. The steps involved in producing. Cable tray making machines are used to manufacture cable trays – an important component in electrical installations and industrial buildings for routing cables and wires safely.
