

Minimum distance from ground level of distribution box

Overview

Place outdoor boxes at least 3 feet above the ground. This keeps them safe from water and dirt. Check and fix the box often to prevent problems. According to the "Code for Acceptance of Construction Quality of Building Electrical Engineering" GB50303-2002, the vertical distance between the bottom surface of the fixed stainless steel enclosure ip67 and the ground should be greater than 1. Generally, distribution boxes can be divided into three levels of secondary protection, that is, three levels of distribution boxes: general. A distribution box is the heart of any electrical system. However, the key to. Min of 18-inch to bottom of receptacle box is trade practice for garages iaw NEC. The application will dictate whose code you will use, ie. In your case, you want the box up off the ground at least 18 inches. Residential: The recommended height for distribution board and consumer unit is between 1 metre to 1.5 metres.
