

Pakistan FC Adapter Energy Saving Type

Overview

You will need to consider what to pack, to ensure you can use your personal electrical appliances safely whilst abroad. This normally includes the use of a travel adaptor, which is a device that simply allows you to plug any UK electrical appl. You will need to consider what to pack, to ensure you can use your personal electrical appliances safely whilst abroad. This normally includes the use of a travel adaptor, which is a device that simply allows you to plug any UK electrical appliance into a foreign electrical socket. It is important to note that it does not convert the voltage or freq. Electricity supplies worldwide can vary from anything between 100V and 240V. It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply. As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Pakistan. If the frequency is different, the n. You can determine whether you'll need to use a converter or transformer, by looking at the appliance rating plate. A dual voltage rated appliance will display for example 'INPUT: 110-240V' on the body of the appliance or its power supply. This means that you will not need a converter or transformer but just a travel adaptor, because Pakistan operat. In Pakistan the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly. Converters and transforme.
