

Should the distribution box have an opening for rain protection

Overview

□□ Specification Insight: NEC 312. 2 requires outdoor distribution boxes to have rain-tight enclosures when installed in wet locations, but many installers mistakenly specify NEMA 3 (weather-resistant) instead of NEMA 3R or 4 (rain-tight), leading to inspection failures and costly. □□ Specification Insight: NEC 312. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. If the box will be exposed to rain, dust, or sun, you'll need one with higher protection — look for models with IP66 or NEMA 4X ratings to stay safe and compliant. Next, match the box to your electrical load. Fixed distribution boxes should be fenced and equipped with rain and impact protection measures. According to GB/T20641-2006 "General.
