

Smart Distribution Box with Solenoid Valve

Overview

It integrates the solenoid valve group box, intelligent control system and control cabinet, and integrates the Internet of Things (IoT), artificial intelligence (AI) and industrial automation technology to achieve precise control, automated management and full-process digital. It integrates the solenoid valve group box, intelligent control system and control cabinet, and integrates the Internet of Things (IoT), artificial intelligence (AI) and industrial automation technology to achieve precise control, automated management and full-process digital. The solenoid valve group box is an integrated control device that installs a single solenoid valve on a manifold to form a solenoid valve group, connects the coil of the solenoid valve to the terminal, and integrates it into the cabinet. This design allows the solenoid valve group box to be. TopWorx is a global leader in discrete valve control and GO™ Switch position sensing for the process industries. Our position sensing technology and discrete valve control enable plants, platforms, and pipelines to manage and control operations more intelligently and efficiently under the most. Digital technologies such as Cloud Computing, Big Data, Internet of Things (IoT), Artificial Intelligence (AI) and Industry 4.0 are phenomenon which are changing the world we are living in. To answer the most demanding market. Intelligent power distribution box is composed of traditional leakage protector, air switch, AC contactor and KC868-H8. Compared with the traditional power distribution box, it is safer to cut off the strong power supply remotely, and it can save energy through the timing mode while controlling the. Our flexible distribution boxes enable reliable, decentralized signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
