

South Asia Pipeline Guided Optical Cable

Overview

MIST will directly connect Singapore, Malaysia, Myanmar, Thailand and India (Mumbai and Chennai) and deliver a design capacity of more than 216 terabits per second (Tbps). Construction of the nearly 8,100-kilometer optical submarine cable is targeted to be completed by the third. The Asia Program in Washington studies disruptive security, governance, and technological risks that threaten peace, growth, and opportunity in the Asia-Pacific region, including a focus on China, Japan, and the Korean peninsula. In 1859, the Dutch colonial administration attempted to link its East. The Submarine Cable Map is a free and regularly updated resource from TeleGeography. TeleGeography's comprehensive and regularly updated interactive map of the world's major submarine cable systems and landing stations. Visualize the growth of global connectivity. The JAKO project represents ARTERIA's first participation in an international consortium.
