

Two routers connected via fiber optic cable

Overview

Yes, you can connect two routers to one fiber modem, but understanding the 'how' and 'why' is crucial for optimal network performance. If you can see there house from your roof, it is also entirely practical to set up a point-to-point WIFI connection to it - and, I expect, will be cheaper. A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. Check the specs, that the advertised wavelengths and desired distance/length match. On each floor each ethernet cable will be connected to a router, which will then distribute the internet. Abstract: This article provides a step-by-step guide on how to connect two routers to an incoming fiber optic supply, with the intention of having telephone and broadband services, while also utilizing additional features from the replacement router such as the Fritzbox 7590AX.
