

U-shaped cable tray with cable channel for network cable routing

Overview

The channel cable tray features a simple, U-shaped or channel-like structure that provides a compact and straightforward solution for supporting electrical cables. It is best suited for light cable loads and is often used in tight or confined spaces where larger tray systems may not. These cable trays from LANZ are made of robust steel, with rounded shapes and with halogen-free polyethylene coating IEC 60754-1 / EN 50267-2-1 compliant (RAL 7035), or stainless steel. This type. The Wire Basket Overhead Cable Tray Routing System is a robust cable management solution that optimizes system reliability, space utilization and scalability. It provides speed of deployment, structural integrity, cable protection and ease of use to drive business results. Cables and lines can be fed in and out at any time and anywhere thanks to the mesh structure. Strong and durable – Made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor applications. Fast installation – Reduce installation costs with quick and efficient.
