

Upgraded version of the Irish micro-module for surveillance

Overview

The current frontrunner appears to be the RBS-23, an advanced version of the RBS-70. Ireland is poised to bolster its air defence capabilities significantly with the acquisition of a new anti-aircraft missile system and its first military radar system, marking a notable shift in the country's defence policy. This move, as reported by the Irish Mirror, signals a departure from. Executive Summary The Irish government is preparing to grant unprecedented surveillance powers to the Gardaí (Irish police), Defence Forces, and Garda. Reach security professionals, CISOs, and compliance teams. For management approval of the complete set of ASTERIX documentation refer to Part 1. The Irish Air Corps Airbus C-295MPA acts as a sensor platform, with data fed back to. THE PRIMARY RADAR project for the Irish Defence Forces to monitor suspicious aircraft on approach to Ireland could cost in the region of €300m and will likely see sites on at least three locations around the State.
