

What is the standard for optical cable grounding resistance

Overview

Conductive fiber optic cable per NEC 770. 100 must be grounded through a bonding or grounding electrode conductor. listed 6 AWG copper strand and. An optical ground wire (also known as an OPGW or, in the IEEE standard, an optical fiber composite overhead ground wire) is a type of cable that is used in overhead power lines. An OPGW cable contains a tubular structure with. This Applications Engineering Note (AE Note) discusses conventional bonding and grounding practices for conductive fiber optic cable and hardware installations within the scope of the National Electrical Code (NEC). They adhere to international 1 and local standards 2 to ensure safety, functionality, and durability, making them essential for modern. Note: This list was assembled from a number of sources with various dates - we doubt it is complete because they change all the time. A full catalog of TIA specs is at This standard applies to all OPGW purchased for.
