

Why are there cable trays on the platform

Overview

Technicians can quickly locate, inspect, and trace specific cables without needing to dismantle entire sections of a closed piping system. Furthermore, the structure is highly adaptable to future requirements, allowing engineers to easily lay new cables or remove obsolete ones. Fittings can, on the one hand, be used for horizontal or vertical changing of the routing direction or, on the other, to change the height or width of the. This type of tray is typically used when cables need shielding from dust, controlled environments. protection of solid bottom trays. These trays are installed overhead or under the floor, depending on the. Ladder rack (also known as “ladder trays” or “cable ladders”) are one of the most common types of cable runway. Cable trays are capable of supporting all types of wiring: such as High Voltage Power Lines.
