

Xqj-c Cable Tray Corrosion Protection Options

Overview

Tray/ladder-type steel cable trays with hot-dip galvanizing, electro-galvanizing or electrostatic powder coating (corrosion protection). Hot-dip galvanized models: excellent corrosion resistance, impact strength, load-bearing; suitable for indoor/outdoor use. Press-formed for efficiency, easy. Legrand wiremesh cable trays are resistant to corrosion thanks to the various available surface treatments. There is a solution for each type of environment. This white paper compares the High Resistance (HR) and Hot-Dip Galvanising (HDG) solutions and highlights the new High Resistance range, ZnAl. In the construction and design of electrical systems, anti-corrosive cable trays selection plays a crucial role in ensuring both the durability and safety of the entire system. This guide provides detailed insights into preventing corrosion and extending the lifespan of cable. Hot dip galvanised (HDG) trunking, also known as hot dipped galvanized trunking, is a specific type of metal cable trunking manufactured in hot-dipped galvanised zinc coated low carbon steel to BS4678 part 1 1978.
